Mendocino, Ca

Dear Ms Dixon

1 [I speak for myself as well as for a large segment of other people in my opposition to your plan to store radiation materials in yucca mountain site, we recognise this to be an enormous hazzard to all life, all this is very clear to everyone by now.]

2 [Each nuclear plant that operates must take responsible action in handeling the waste that comes from their plant and not leave it to some unknown handlers to do their work. Where one is responsible, there is usually, much better handeling.] I wish everyone good luck in this so that we can come up with a good solution to this most hazardess issue we all must face as well as pay the price with our lives ultimately.

Sincerely
Minucha Calburn
