Is economic "progress" killing the planet? Nov 28, 1999

Let's ask our leaders, professors and policy makers.

Hi - The Yucca Mtn. DEIS is a sham and a farce due both to constraints placed by 1987 Waste Act and to DOE historically consistent lousy estimate of public danger and single-minded determination to implement grand plans that later turn out to be cataclysmic failures. On site retrievable storage along with a massive commitment to research over the long term on saner alternatives is the only immediate answer to this huge problem. Larry Turk, RN POB 7162 Missoula, MT 59807
