1... We appreciate the chance to voice our concern, regarding the transportation of nuclear waste thru our very busy city.

An accident would be a disaster for our residents as well as tourists. The very idea of nuclear waste materials on our already busy roads is insane!

As the Government continues to build the facility at Yucca Mt. for these waste materials, the majority of thinking, concerned citizens, oppose this facility at Yucca Mt.

2 What about the future! Ground water contamination has already been established and yet they build on.

1 cont. The Government tested the atomic bomb here with fatal results in cancer deaths. However, people were told then too that all was well!

2.

1 cont. What does our vote really mean?
Please think about the children and their quality of life.
I just ask God to help us all before all is polluted and destroyed.

Sincerely,

Sharon K. Cox
