To All:

Since thousands of public comments on the Draft Environmental Impact Statement have not been addressed, how can the Secretary of Energy be preparing to recommend Yucca Mountain for a high-level nuclear waste dump?

Without a Final Environmental Impact Statement, a detailed transportation plan or a licensing rule, the Dept. of Energy lacks the basis for consideration of site suitability.

The public cannot have confidence in any recommendation that arises from such a terribly flawed process. I ask you, and urge you, to abandon the Yucca Mountain project.
