Comments: (If possible, please reference section number and/or page number in document if applicable.)

It's time for perhaps the greatest citizen uprising in the history of the United States! We will not longer tolerate politicians, who are bought by wealthy corporate interests to generate even more radioactive waste which will then have to be stored.

1 I think we must DEMAND that our government Right Now
2 halt further energy methods which produce nuclear spent fuel & radioactive waste. We are completely opposed to transporting such waste through St. Louis or anywhere else in the US. Travel with such waste is inherently dangerous due to the possibility of earthquakes, terrorism & accidents.

A crime of great proportions had been perpetuated against the American people as corporations & nuclear facilities have produced waste nuclear spent fuel, radioactive wastes & other chemical waste that have caused the cancer rate to soar in the
3 US. I expect to be protected in my home & the USA. I expect my air & water to be clean & I expect that the government will immediately allot money to find a solution for safe disposal of this waste & will dispose of the ridiculous idea of transporting it.

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable, the Department will consider comments received after February 9.

Please feel free to attach additional pages, more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible; then secure with tape.

I want the DOE any government agencies, Congress & the President to start now to clean up the entire mess, & stop listening to corp & energy interests.
