RE: Transportation of Nuclear Waste through metropolitan/residential areas via rail & road

1... Please stop this before it starts.

Better yet, begin putting an end to the production of this waste in the first place.

2 Put your intelligence & resources toward developing renewable forms of energy, especially solar.

Sincerely outraged,

Barbara Cox

(over, please)

EIS001217

P.S. This plan is so outlandish, dangerous and brazen there must be big money in it for someone(s).

...1 Please think of the ordinary people who will be put at risk by this plan. Will you be able to sleep well at night, waiting for the inevitable to happen & knowing it is on your conscience?
