Dear Miss Dixon,

1 This letter is in regard to the transfer of nuclear waste across MO. I live in a small town here in MO, though I don't know exactly where the railroad line is that will transport this crap, I am sure it will reach me & my relatives & friends if it derails.

Please do everything in your power to stop this from happening.

People are dumping oil into our oceans, Now we have people trying to kill us w/ nuclear waste.

Yes, the end is surely near. Our lord will not forgive us for ruining what only he could create.

God Bless you & have mercy on your soul for trying to save us.

Therese M Salmons
