Wendy Dixon,

I wrote you in concern of the Nuclear Power transportation. I'm not a really big Ecological freak (belive me) in any other situation I wouldnt care what you did. But what you are doing is you are laying nuclear waste in a remote area. That will mess up all the wild life, and sooner or later we wont have any animals to hunt so we will all get very sick and eventually die. I am writing in concern. Dont.

Sencerely,

Andy Valner
