Re: Yucca Mt. Site
From: Dr. & Mrs. ~~Debra~~ Douglas Wiens
685 Clark Ave, St. Louis MO 63119

1 We strenuously oppose the transport of the nuclear waste through this large metrop. area. Not only will the toxic material pass within reach of thousands of homes and businesses, but also schools, playgrounds and community centers. We have train accidents in Kirkwood & Webster Groves, MO. Imagine the disaster when it involves the nuclear materials! Doug is a Professor of Geophysics, a seismologist who studies the ground movement. We trust that you have done honest studies of Yucca Mt. We also trust that you will do what is right in terms of transportation.

Debra Wiens
