DEAR MS. DIXION

I am a student in Rosemary clark middle school. I am writing this letter to tell you some of my consens and thoughts about yuca mt.

1 In class we have been learning about what radiation can do and how long it can last and what efects it can have on plants and animals. I dont think we should put it in that mountin because if it does leak its going to seep into the water suply That is my main consern because everything in the desert uses that water. and if it contamanates the soil it will kill many plants and animals

sincerely
R.J. Baginski
