Office of Civilian Radioactive Waste
U.S. Department of Energy M/S 010
P.O. Box 30307
North Las Vegas, NV 89036-0307

Dear Ms. Dixion, EIS Manager:

I am concerned about the Nuclear waste that is going to be stored at Yucca Mountain, which is located
1 near by. The side effects of it leaking is quite large.
2 The wildlife and water supply could be severely damaged
3 by this. The casks have not been tested for extended
4 periods of time. I'm worried that the effects to the economy in Las Vegas due to the transporting of the waste will increase.

5 Instead of just storing the waste and paying, have the scientists work on a way to decrease the radio-activity faster. I fear that just ignoring it will only make it worse. We leave it to the the people who made the waste. Thank you for your tim.

Concerned student
