Dear: Mr. Dixon, Eis Manager.

1 It is not right to send nuclear wast over to states that don't want it. You should Keep it where it is now, and stop sending it over here.
2 What I think, who makes it, should deal with it there selves and stop sending it over here.

3 The world is very big they shoud put it on a island and put the toxic west there instead of here. So nothing will get contaminated and that would solve
4 part of it, the should stop useing nuclear power at all. That is my solution

Sincerly.
Charles M. Stevens
