North Las Vegas, NV 89036-0307

Dear Ms. Dixon, EIS Manager:

I have a concern about nuclear waste. I am a student from Rosemary Clarke Middle School and we are studying nuclear energy. I think that transporting nuclear waste from the east to Nevada is pointless. Why can't the states in the east keep their own waste? Also it is hazardous to our local environment and our economy. I think it is ridiculous transporting nuclear waste down I-15. In the area where their transporting waste is 37 schools, 2 major health facilities, 1 special event center and 23 hotels. This does not include the number of family homes in the area. 1 2 3

I think even though millions of dollars are being spent our schools are getting nothing out of it. I think the waste should stay in the state that produced it. 4

An angry student,
Wesley Heim
