Subject: EIS Comment Transcript

The following is a transcript of the comment left on our EIS phone line answering machine. The message was recorded on the night of 8/5/99. I am of coarse unsure of the spelling of his name. In addition, part of the message where he gave his address was garbled as indicated by the parenthetical notation.

1 "No, I'm not calling for one of your drafts. I've seen the one on the Yucca Mountain plan in Nevada where  
2 you guys don't even discuss about what the hazards are of taking your waste through communities and  
what could happen. This is ignorant and uninformed position that you had. Evidently, you people don't  
really give a rat's behind about anybody in this country other than stuffing that nuclear waste down those  
peoples in Nevada throats and it's wrong. Those guys should be..... if you benefited from nuclear in your  
state, you live with the waste; period. What you want to do is immoral and criminal; its dagerous; and its  
malfeasance at best. My name is Mark McNelley and I live in Las Vegas and my office is 3770 South  
Swensen...." (Garbled on the machine). "202, and you are welcome to write me anytime and try to rebuke  
this and you folks on this are as about as ignorant as you be."
