Dear Ms. Dixon, EIS Manager:

I am a student at Rosemary Clarke Middle School. I live in the town of Pahrump and my name is Sarah. I've been learning about
1 the Yucca Mountain Project. Why does all this country's waste have to come to Nevada?

2 When the waste is being transported through the city there will be a very high risk of an accident. If an accident does happen our medical response teams might take a while to respond. Also, these trucks will be going through residential areas with children at play. What if a truck got in an accident right next to a school?

This is just a possibility of what could happen if the waste is stored in Yucca Mountain.

Student at Rosemary Clarke Middle School
Sarah Lozofsky
