Dear Dr Summerson:

1 The plan to ship irradiated fuel rods through St Louis is a terrible idea. (It's a terrible idea to ship them anywhere!) But this year, 31 May, a train derailed & dumped fourteen cars of coal across the street from Webster Groves homes. Webster is a suburb of St Louis. We have bridges, railroads and highways, but we sure don't want those fuel rods coming through here for 30 years -- or even one year.

2 Please keep them to cool down on their existing reactor sites.

Yours -

Elsa L. Mutrux
