Dear Carol Hanlon,

How can the Secretary of Energy be preparing to reccomend Yucca Mountain for a high-level nuclear waste dump when thousands of public comments on the Draft Enviromental Impact Statement have not been addressed? Without a final Enviromental Impact Statement, a detailed transportation scenario or a licensing rule, the Department of Energy lacks the basis for consideration of site suitability. The public cannot have confidence in any recommendation that arises from such a dramatically flawed process. I urge you to abandon the Yucca Mountain project

Sincerely,

Shirley J. Davis
