To: Whom it may concern
RE: Yucca Mountain Repository
From: Melinda McGeorge Johnson

My husband and I and our 5 children HIGHLY PROTEST the placement of nuclear waste in our state.

Those STATES that create the waste should be responsible for its burial. The citizens of the state of Nevada should not be penalized by being forced to harbor the potentially lethal nuclear waste and hazardous material created by others.

We have families, a clean environment, and the values that other Americans hold dear. Please do not challenge our lives by placing us in the jeopardy that a nuclear waste repository potentially holds.

Thank you.
