Dear Ms. Dixon:

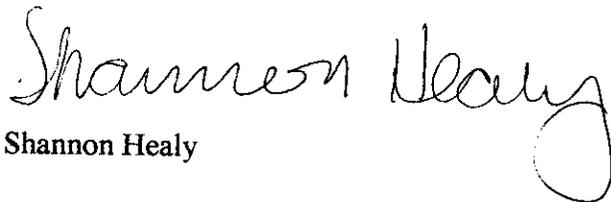

My name is Shannon Healy, I am a student at Washington State University. I am currently enrolled in an Environmental Science class and listened to a presentation about the Yucca Mountain Project from my TA Kelly. Prior to her presentation I had no knowledge of what was going on in Nevada and I was very intrigued about what she had to say.

The information that Kelly presented to us was a view on the problems with the project, nuclear waste, and the Yucca Mountains. With each part of the information on the project I could see the problems with what this could do to the people in the area and the mountain. I am sure it is more complex then I know about. It just seemed a little obvious to me that the Yucca Mountain was not a good choice to put this nuclear waste site.

1

With the information that I do know about this project I would like to say that I am not in favor of this going through. I would like to show my support to you and the cause. If there is more information about the project you could send I would appreciate that please. I hope that you and all the people that are involved accomplish all that is needed to stop this project from happening in the Yucca Mountain.

Sincerely,

Shannon Healy
