

Dec 27 1999

- RECEIVED

EIS000486

Dear Ms Dixon:

JAN 03 2000

- 1 I am opposed to the DOE Plan to bury nuclear waste at The Yucca Mountain site.
- 2 I am also opposed to weakening the EPA standards for protection from radiation. The standards are too weak and should be strengthened.
EPA's 15 mrem dose should be lowered and the EPA's 4 mrem/year ground water protection standard should be upheld.
On site compliance to these standards should be required for as long as the nuclear wastes are hazardous.

Sincerely

Peggy Jacobs
