Comments: (If possible, please reference section number and/or page number in document if applicable.)

- 1 I was very disappointed to learn that Nevada is the only site being considered for a nuclear waste dump site. Is this because Nevada is a small state with less money and political power? Also in the Review Journal an article stated that all safety standards were to be lifted for Yucca Mountain. Since we now know that Yucca Mountain is sitting on a fault line and ground water runs under it, how can Yucca Mountain be a
- 2 safe site for nuclear waste? I am also concerned about the trains and roadways transporting waste into Nevada. There is a large safety concern for trucks with waste
- 3 crossing the Dam. I am strongly against putting a nuclear waste depository at Yucca Mountain and I want other sites to be considered, and more studies to be conducted on Yucca Mountain before final approval is made.

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9.

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible; then secure with tape.
