- 1 Comments: I cannot understand why Yucca Mountain was chosen as a site for nuclear waste. The Las Vegas area has traffic problems, accidents constantly, it is a major tourist area, and has an exploding population.
Transporting and storing such hazardous waste with these circumstances considered, makes you realize this is a major catastrophe waiting to happen.
I was born in Las Vegas, left, and returned five years ago. My children have moved here from California, also. We had planned on retiring here. If this project goes through we are going to relocate, as well as the rest of our family. Our son who is fourteen loves it here and had planned on going to UNLV. Even at his age he has decided if nuclear waste is brought herre he will leave, too.
- 2 I'm hoping and praying that common sense will take over and a decision will be made not to bring such a death sentence to our community.

I'm hoping
