

PUBLIC STATEMENT OF NICK CLARK

DEC 01 1999

1 . MR. CLARK: Hello. My name is Nick Clark. And I have lived here for all my life, which is 13 years, which you may think is not that long. But this is my home. This is where I have lived all my life. And you are deciding to put your waste and the waste from all the other states in the East in my home, I just can't stand it.

2 All these things are happening. Think about it. There's -- if you put it in, it will affect the ground water, which will affect the whole state, even nearby states. If we have earthquakes, they will go into the water.

If we have an earthquake as well, it can also affect it into the air. And that will affect Idaho, it will affect Oregon, it will affect California, it will affect us.

3 And I want to know, why are you doing this? Why do you want to affect all these plants just so you can store some waste that you -- well, you just don't want it where you are, and why you don't want to have other resources in other ways.

That's about all I have to say.
