

MR. PAUL: Hello. My name is Lance Paul. And I don't have a formal presentation to make.
But I do have some comments.

1

I don't understand why Congress has allowed this process to go through without addressing the need for this repository and the other -- the availability for use and the alternatives to geological disposal. I feel like it's a sham.

2

This is a beautiful valley, and we all love it and live in it, and this railroad will destroy it, in my view. This is a horrendous act of arrogance to think that we can safely store high level nuclear waste for 10,000 years. How long have we even been a country? 250 years? 10,000 years is outrageous.

3

We have got to come up with a better solution than this. That's the end of my comment.
