

RECEIVED

7 MS. JONES: Hi. I'm Donna Jones from Alamo. I  
NOV 09 1999  
8 am a survivor of Timpaiute and I was told the same thing that  
9 Hal was told.

1 10 I want to make a quick comment that I've not  
11 heard anybody mention, that if we cannot -- if we cannot build  
12 a rocket safely to send out to space without it being defective  
13 or our airplanes that we are currently going through in the  
14 news, how can we trust that these casks are going to be so safe  
15 and not leak?

16 I believe that we're going to have problems  
17 because there's human error in everything, and I believe a  
18 rocket costs millions of dollars to build and these casks, they  
19 don't cost quite that much.

20 That's all I have to say.

21 MS. SWEENEY: Thank you.
