1 Comments: As a resident of Las Vegas, I'm sure it's not a huge surprise that I am against the YMP. As our population continues to grow, due to an amazing economy, having nuclear waste trucks passing through our busy streets, highways and freeways would be a disastrous decision. It would also be remiss to ignore the earthquakes we have experienced in the past few years. Perhaps we have not felt the magnitude of the earthquakes that other parts of the world have, but the tremors serve as a reminder of the frailness of our land here.

Please keep these important points in mind when making your decision and search for a less volatile location.

Sincerely,

Shannon Okahara
