1 Comments: For the sake of my children, and all of their children after them, please keep the repository for nuclear waste out of Yucca Mountain. I am just one citizen of the great state of Nevada, but I know that if each one of us speaks, we will make a giant roar against Yucca Mountain's being used for nuclear waste. You can site me report after report on the safety and efficacy of this waste dump, but all it takes is one revisit through the history of the "unsinkable" Titanic, to know that statistics are only as good as they apply to each specific instance.

Thank you for your time.
