

Jan. 10, 2000

Dear Ms. Dixon:

I'm writing in opposition to the "Mobile Chernobyl" bill, S. 1287, which would allow nuclear wastes to be shipped across the country and stored at Yucca Mountain.

In view of all the reckless drivers on the highways, the DOE would be playing Russian roulette to ship nuclear wastes. This stuff should be left in place and covered with some inert substance like cement, checked periodically for cracks, and recemented when necessary.

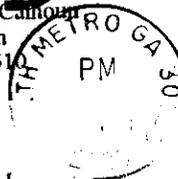

In addition to concerns about safety en route, serious questions have been raised about the suitability of Yucca Mountain as a storage site.

Sincerely,

*Emily B. Calhoun*  
Emily B. Calhoun
