

Draft Environmental Impact Statement  
for a Geologic Repository for the  
Disposal of Spent Nuclear Fuel and  
High-Level Radioactive Waste

**Comment Sheet**

I request that these comments be made a part of the official record.

1 | What constitutes a disqualifying condition or factor for the Yucca Mountain site and what specific conditions at Yucca Mountain would cause you to recommend the site be disqualified?

Since DOE has now acknowledged that the groundwater travel time at Yucca Mountain is so short that it meets the disqualifying condition in DOE's own siting guidelines, why hasn't Yucca Mountain been disqualified under the provisions of the Nuclear Waste Policy Act?

2 | Will one of the three thermal load alternative designs in the EIS be the actual repository design the DOE will submit to the NRC for license application? If not, will there be an EIS supplement?

How will the EIS deal with the currently discussed possible range of time between waste emplacement and repository closure of 50 to 300 years?
