Comments: (If possible, please reference section number and/or page number in document if applicable.)

1 I think the more economical way to handle this radioactive waste is to leave it where it is currently. There have been many scientific breakthroughs and soon this waste will be able to be recycled into something usable. We need to put more money into finding more viable solutions that don't put the whole nation at risk for terrible accidents.

2 The Las Vegas residents and economy will be negatively impacted by the nuclear dump. An accident will happen sooner or later. The tourists will stop coming and our boom town will go bust.

3 I am very concerned about our drinking water. I have two small children. Who is going to guarantee their health and safety? When residents start getting cancer who will be to blame?

4 The Las Vegas roadways are congested and dangerous now. We do not need highly radioactive waste adding to these problems.

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9.

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid self-mailer. To do so, fold in this sheet
