Comment Text :

1 --I am concerned about the implications of your proposal to store nuclear waste at Yucca Mountain. The area is plagued by frequent earthquakes, and because of the amount that you intend to store there, the smallest radioactive leak can and will have profound consequences.

2 Your proposal not only jeopardizes the surrounding land, its inhabitants, and our ecosystem, but the environments of those who are along your transport route. You do a great disservice to our government and its "duty to protect the people" when you fail to SERIOUSLY consider the impact of your actions.

3 I cannot supply a better alternative than the one that you are proposing, but that is merely because your best alternative--to place a moratorium on nuclear energy until an acceptable waste management plan is developed and implemented--was bypassed years ago. Perhaps OUR money would be better spent researching AND FINDING a use for this radioactive material, rather than burying it.

I hope that you take my comments and those of other concerned citizens seriously, as your decision will affect our lives. Thank you for your time.

Sincerely,  
Jamie Scott
