I request that these comments be made a part of the official record.

- 1 I wish to state for the record that I oppose the storage of nuclear waste at the Yucca Mountain Site. Since your understanding of how the disposal site will work has only been tested on models, which are not good enough for nuclear weapons testing, then how come model testing is good enough for storage ?? How can you have an evolving facility that releases some radiation ?? Where are the numbers & the studies on just how much you are going to allow to be released and over what time frame?
- 2 It seems that the D.O.E. has made up their mind & plan to do this no matter what anyone says !!
- 3 What about transportation ?? How are we the public supposed to make a decision on impacts when the D.O.E. isn't clear on the transportation routes, the containers, & even the mode of transportation ??

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9.

Thank You !
Cynthia Carroll
