Comment Text :

-->Ladies and Gentlemen:

1 | I recommend the No-Action Alternative.

The prodigeous work that has gone into this draft EIS makes my job and my recommendation much easier, and I thank the writers of this draft EIS. I am grateful I just had to read the document, not prepare it.

As thick and well described as the trees are in this draft EIS, I cannot avoid the conclusion that the forest represents neither good science nor good policy.

I realize a solution must be found to the problem of nuclear waste disposal in our country, but this EIS, in toto, demonstrates to me that Yucca Mountain is not the solution we need.

Again, I recommend the No-Action Alternative.

Thank you.
