Comments:

On Jan 31, 2000 a transport identified as having hazardous waste parked in front of the general store in Shoshone, CA. The local sheriff observed liquid leaking on the pavement. The transport was detained till the following day. The load was then changed to another truck and the spill cleaned up.

1. Who supervises the suitability of the vehicles used in transport?
2. What penalties for violation of public safety rules?
3. Should not the public be informed of hazardous waste shipments?

Please note: For your comment(s) to be considered in the final rulemaking, your comment(s) need to be received by the Department of Energy by February 28, 2000. To the extent practicable the Department will consider comments received after February 28.

If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible; then secure with tape. Please feel free to attach additional pages; more postage may be needed.
