Comments: (If possible, please reference section number and/or page number in document if applicable.)

- 1  Nuclear Waste should not be transported; nothing will convince me that @ transport is truly safe or (b) that <sup>nuclear</sup> power should be allowed to be generated at all; that is to say, that at every level of production and disposal, it's so very dangerous that to claim that it is safe and "clean" is to deceive the public. The costs of protecting the public health during production and disposal cannot be calculated ~ and not just human health ~ all living organisms are endangered. Except, of course cancer. As kudzu over runs territories, cancer is nuclear power's crop of choice.

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9.

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible; then secure with tape.
