Comments: (If possible, please reference section number and/or page number in document if applicable.)

1  
 [ Railway in U.S. is predominately privately owned. There is currently no responsibility of the Dept of Transportation to regulate Americas Railways. DOE has relied only on CAITRANS report on the safety of the Railway in California. I submit to you that the DOE does not have adequate information regarding the safety of the rails and whether they are capable of safely carrying this dangerous materials before moving forward. I request that DOE commission and independent study on the safety of rails that are proposed to be used, accident reports and worker safety and staffing. The Railway in Calif are not been studied by anyone. How can you move forward without this valuable information? ]

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9. 28

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible; then secure with tape.
