EMMA HAWKSLEY

JAN 20 2000

- 1 MISS EMMA HAWKSLEY: Hello. My name is Emma Theresa Hawksley. [The nuclear waste shipment is shipped by train and you should not send through the nuclear waste because it can hurt so many people. If you bury it in the ground and there is an earthquake with barrels in the ground, the barrels will break open and all the nuclear waste would spill out and kill millions of people. In a child's point of view, I say no to shipping nuclear waste because it will probably kill me, my friends and my family and et cetera. I mean, think about it, it will even kill you and you and destroy the environment, so please don't ship the nuclear waste through our neighborhoods because I know you don't want to be in charge of bad stuff.]
