Wendy Dixon, Project Manager
Yucca Mountain Environmental Impact Statement
Office of Civilian Radioactive Waste Management
P.O.Box 30307 Mail Stop 010
North Las Vegas, NV 890-0307

Dear Ms. Dixon:

1 [A matter of deep concern has come to our attention - staying in our thoughts and hearts.

We have learned that radioactive nuclear waste is to be transported via railroad through residential areas of Missouri - near our home, at a rate of every two days for thirty years. This plan is beyond understanding, certainly causes alarm, and earns strong objection.

In the implementation of such a plan for disposal of much hazardous waste, your Agency MUST reconsider the possible danger to many lives, and in conscientious deliberation devise a better plan.

Yours is not an easy task - probably finding objection at every turn of different plans for this waste disposal. But as Project Manager, we strongly encourage you to bring deep concern before your Agency to show compassion for all the lives of citizens and communities endangered over a long period of time.

Thank you for "hearing" another opinion!]

In desperation,

Cay Moehle
