SUZY SNYDER for Charles Senos

MS. SNYDER: Hey, everybody. I'm glad you made it out here today. It's really good to see a lot of folks here. I was asked by a friend of mine who unfortunately can't stay because he signed up to speak, but he's not going to be able to speak until 1:00 or the 2:00 in the morning and he's 6 years old and needs to go to sleep. So he asked me to read his comments, and so I'd like to start off with that. His name is Charles Senos, S-e-n-o-s, and he says this."

1 "I don't like when you dump nuclear waste at Yucca Mountain because it hurts the yucca on Yucca Mountain and it hurts plant life. You should put your weapons down and you should break your plane wings. I've seen you leave your lights on in the daytime and I've seen your bomb planes flying right over the test site. I've seen your helicopters flying really close over Ward Valley, and when you dump nuclear waste, it hurts mother earth, too.

"Children used to play on Yucca Mountain and they ran down the hills. They can't do that when you put the nuclear waste there." That's what a 6-year-old had to say about Yucca Mountain.
