1 I would like to know what you have planned for the safe transportation of nuclear waste from all over the country and if you have addressed this in your EIS? I'm sure we all know that the Yucca Mountain site is a forgone conclusion and the safe transportation of nuclear waste is of great importance to the whole country. Between Hospitals, research facilities, The military, and power plants located from one end of the country to the other, I believe that this issue should be addressed fully before any approval of this facility to operate is issued.

sincerely, Nancy Jakovac
