Subject: RE Yucca Mountain

Dear Dr. Summerson,

With reference to the letter received dated May 4th 2001 regarding the proposal to deposit Radioactive Waste at Yucca Mountain I would like to make these comments.

#1 May I say that most of the information contained in both reports is beyond my comprehension, { Engineering and Science } not my field of interest , however I do have an interest in moving this material safely.

1... #2 My advise to all the communities involved which looks like the entire USA would be to look for solutions to make the transport of this material safer.

#3 It would appear due to a paragraph on page 3 of the Executive Summary stating as of Dec 1999 {not too long ago that our scientists are working on a solution to make transportation safer.

#4 I am aware that there are two situations involved in this procedure ie The already stored material which could be leaking and the waste produced daily by our Reactors all over the States

#5 Safety of this transportation of all of this material is of the utmost importance to humanity.

1

1 cont. #6 My opinion of the fact that this proposal for Yucca Mountain seems to be a DONE DEAL already, would be to concentrate on complete safety on all measures taken by the DOE etc. \_\_\_\_\_

010061

2 #7 Not much more to say as I am not a resident of Nevada . I am a property owner in Crescent ~~Valley~~ (Walla Walla) and I have communicated with Ms Abby Johnson in the past regarding this proposal and did suggest a Mono Rail for transportation..... \_\_\_\_\_

In closing would you kindly refer me to one of the scientist involved in this research .

It is of the utmost importance that I make contact with a Trustworthy reliable person.

Thank you,

Sincerely,

Margaret Meharg
