- 1 MS. CORNELIUS: My name is Betty Cornelius and I'm with the Colorado River Indian Tribes. And I would like to say that I concur with our spokesperson and everything that he has said and that in the early nineties our tribe went and passed a resolution declaring that our reservation is free from nuclear waste and we did this in regards because we knew that nuclear energy was going to be impacting our life on the reservation. That's all I'll say.
