--> Comment Text :

1 | I oppose Nevada's Yucca Mountain as a storage site for high-level nuclear waste. This region is earthquake-prone, presenting a risk for long-term storage. In addition, water flows beneath the mountain, so it could infiltrate the waste containers, corrode them and carry radioactive waste into the groundwater.

2 | I am also concernd about the 60 million Americans living in 43 cities along potential nuclear waste transportation routes to Yucca Mountain, since there could potentially be accidents and spills in transporting nuclear wastes. |Please allow time for greater public education and input on this important issue.|
