To whom it may concern,

1 I am very worried about contamination from nuclear waste. It seems that folks like to use our western states as a dumping ground for nuclear and toxic waste. The state of Nevada has already been used for years as a testing ground for nuclear weapons and the disposal of radioactive waste. These lands may seem barren, but they are not. Home to plants, animals and humans, they shouldn't be treated as a wasteland to pollute.

I suggest that you figure out a better way to deal with this radioactive contamination.

Sincerely,
Pige Franco
