1 [Simply put, nuclear waste must not be stored at Yucca. It's clearly too risky; once groundwater is contaminated, it cannot be fixed. Children, as always, are at the greatest risk from mudbrained calculated risks by grownups. What a public relations disaster for the industry if this thing ever goes through! And does the government need to take on any more embarrassment and controversy than it already has??? Geez, people, think of this as your own back yard, and then think hard if you care about your own children at all. Sooner rather than later, shortsighted decisions like this can come back to haunt everyone.] Kindly wake up!
