1...

This letter is to put my comments on the official record that I am opposed to the use of Nevada's Yucca Mountain as a storage site for high-level nuclear waste.

The most important reason is that scientists have determined that the region is earthquake-prone. In the event of an earthquake, the nuclear waste and the radiation from the waste could easily be released into the air and the contamination could be spread far and wide.

Secondly, water flows beneath the mountain, and this water could infiltrate the waste containers, corrode them and carry radioactive waste into the groundwater. Once this gets into the groundwater it will be IMPOSSIBLE to remove and anyone dependent on the water for either drinking or agriculture will be out of luck.

Please scrap the Yucca Mountain proposal. Thank you for the opportunity to
comment on this issue of vital interest to the USA.↓

Best regards

Cynthia Radcliffe
