Comments: It appears that your mind is made up about sending the nuclear waste to Nevada even though there have been many negative report, i.e. earthquakes, water seepage, close proximity to inhabited areas - ... Apparently New Mexico would like to have the nuclear waste - send it there and not here to Nevada. Not only would it affect our life, but it will affect future generations

Many people who lived near the test site or participated in the testing of bombs died of cancer or other related diseases. We do not need to have nuclear waste in our back yard.
