Subject: Yucca Mountain Project

Part of Records Package / Supplement / Correction

If the nuclear waste to be stored in Nevada is so safe, why bring it all the way across country and take a chance of an accident, The states that produce it should be required to store it in their own backyards. I could go on forever, but the fact remains most Nevadans do not want it here, so how many times do you have to hear it before it starts to sink in?
