Subject: Yucca Mountain Nuclear Repository

Part of Records Package / Supplement / Correction

I read the Letter to the Editor about DOE dumping the nuclear dump on Nevada. About 10 years, I obtained a copy of the EIS that had been prepared about the dump. I can't believe we are still battling over who gets this horrible waste. My parents lived in McGill, Nevada, which is north of Ely, Nevada.

Anyway, my Dad used to tell me how many people in the White Pine Area had been stricken with cancer. I think it is pretty sad when only one state is the candidate. Sometime ago, several senators/ reps from back East made the comment that Nevada is a wasteland and it doesn't matter what we do to the state. It certainly does matter what we do to Nevada. People live, breathe and work in this state and why should our state be contaminated with nuclear waste. Also, the trucks will probably go through Wendover, Utah, Wendover, Nevada and then proceed to Mercury, Nevada, via the White Pine County roads because White Pine is pretty isolated from everything. I worked at the Nevada Test Site from 1961 to 1962 to earn money to continue my education at UNR. I hope that Nevada and its government can have enough "Oomph" to veto this study. Let the states who generated the waste, keep it. We don't want it.
