Subject: NUCLEAR WASTE

Part of Records Package / Supplement / Correction

To Whom It May Concern:

Let it be known that I am NOT in favor of shipping nuclear waste across the country on our rail system or any other way. With the threat of terrorism looming stronger every day, we do not need to compound the situation using our own resources.

I live near Webster Groves, MO, where there was a recent derailment of 13 railroad cars in a well-populated neighborhood. As far as I know, it has not been satisfactorily explained how this occurred. The rails planning to be used for the shipment of nuclear waste are in my neighborhood as well as in Webster Groves, MO. It does not bode well to have this type of cargo transported through populated areas. I feel it is a very real threat to our neighborhoods and cities.

Please rethink your stance on this subject: I urge you to store these lethal wastes in the places of origin and instead look for alternative sources of energy that can be used safely and productively.

Sincerely,
Jackie Saufnauer
Kirkwood, MO
